

데이터관리론 Homework#3

201823869 조성우

Assumption

1. As the Problem suggests that the garage has more than 700 spots, I assume the garage is divided into a few floor, so I let 'Parking Spot Floor(Attribute)' assigned into '**PARKING SPOT**' Entity.
2. I defined "The customer's basic contact information" which is described Attributes in the problem as 'Customer Name' and 'Customer Phone Number'.
3. Hourly customer should has assigned Customer instance, that is, one Customer instance should be assigned to Hourly customer.
